SOFTWARE ENGINEER II (FRONTEND)

Frontend Engineer with 4 years of experience building scalable, high-performance web applications. Specialized in performance optimization, real-time systems, and AI-powered insights. Proven track record of delivering measurable impact in developer productivity, system performance, and user experience.

KEY ACHIEVEMENTS

- Reduced bundle size by **95% (43MB → 1.8MB)**, improving load time by **80%+**
 - Led **Angular migration (v9 → v20)** across enterprise application
 - Built **real-time systems using WebSockets**, eliminating polling overhead
 - Developed **AI-powered insights assistant** for engineering metrics
 - Improved **Core Web Vitals (LCP/TTI)** via code-splitting, lazy loading, and caching strategies
 - Introduced **performance budgets & CI checks**, preventing regressions in bundle size and load time
 - Designed **modular/micro-frontend-ready architecture**, enabling faster feature delivery and team scalability
 - Increased **test coverage with automated UI tests**, reducing regression bugs in releases
-

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Frameworks: Angular, React, RxJS, Tailwind CSS

AI & Tools: OpenAI APIs, Prompt Engineering, LLM Integration

Performance: Webpack, Lazy Loading, Code Splitting, Caching

Backend & APIs: REST APIs, WebSockets

Tools: Git, Docker, Kubernetes, CI/CD

EXPERIENCE

Software Engineer (Frontend) | Kyndryl (IBM) | Jul 2022 – Present

- Architected a **DevOps intelligence platform** to track SDLC metrics, improving developer productivity and release visibility
- Led **Angular migration (v9 → v20)**, reducing bundle size from **43MB to 1.8MB** and improving performance by **80%+**
- Implemented **real-time updates using WebSockets**, eliminating polling overhead

- Built **security intelligence module** aggregating vulnerability and compliance data
 - Developed **release management workflows**, improving deployment efficiency
 - Led **design system migration**, ensuring consistency with zero regressions
-

PROJECTS

AI DevOps Insights Assistant

- Built AI assistant using LLM APIs to generate insights from engineering metrics and detect bottlenecks
- Implemented **semantic search over logs/metrics using embeddings**, enabling contextual query-based insights
- Added **role-based insights dashboards** to personalize recommendations for developers vs managers

Frontend Performance Playground (Side Project)

- Built a benchmarking app to compare rendering performance across Angular and React implementations
- Implemented **virtualization, memoization, and lazy loading strategies**, improving render efficiency
- Measured and visualized **Core Web Vitals (LCP, CLS, TTI)** using real-world scenarios

System Design Case Studies (Side Project)

- Designed scalable frontend architectures for systems like **chat application, Netflix UI, and analytics dashboards**
 - Documented API design, caching strategies, and component-level scalability patterns
-

EDUCATION & CERTIFICATION

B.E. (Electrical & Electronics), BMS College of Engineering | CGPA: 8.6
AWS Certified Solutions Architect – Associate
